

HEALTH, SAFETY & ENVIRONMENT POLICY STATEMENT

Our Health, Safety & Environment Policy Statement is summarised below. This will be reviewed on a yearly basis. Safe Construction Training Solutions Ltd are committed to effectively managing HSE matters as an integral part of our business. The goal is that no persons should be harmed or others whilst at work and should be allowed to go home safe at the end of a working day. Working together we are committed to achieve the highest standards of HSE through:

- Complying with all applicable directives, laws, Regulations, Codes of Practices and Project specific

HSE requirements which are considered to be the minimum standards to follow.

- Incorporating HSE considerations in the planning.

- Aiming to introduce improved processes to continually improve HSE performance if and when required.

- Providing sufficient information, training and supervision to enable employees and others under to minimise the impact on the environment and to contribute positively to their own health and safety and protection of the environment.

- Ensuring that Office Staff are provided with relevant information on HSE standards for the current work activity.

- Establishing safe and ergonomically sound systems of working and a healthy working environment in the office and on construction sites when visiting.

Management is committed to promote HSE awareness, understanding and care in all areas of the business. When visiting sites, ensure our trainers follow the clients and Contractor implemented HSE systems. Empowering our trainers to raise any concerns if there is a risk to them or anyone else when visiting site.

We all believe in Safe Construction Training Solutions Ltd that Health, Safety, Environment, Quality are of equal importance to all areas of the business.
